SUPPLEMENT TO
REPORT NO.

25X1X

1. Around the end of 1951 the East German Zentralamt fuer Forschung und Technik (Central Office for Research and Technology - ZAFIT), Fachgebiet Kohle und Energie (Special Field, Coal and Power) commissioned Professor Rammler (fnu) of the Bergakademie Freiburg to develop an apparatus for the continuous production of powdered coal by means of pressure release. Rammler constructed such an apparatus; it has been in operation since the beginning of 1952.
2. Attached are two diagrams of the apparatus constructed (a) with a bucket wheel and (b) with a piston pump. They are forwarded to you for your retention.
